

Join us for a free
three-part webinar series
centered on **news** and
media literacy skills.

checkology®

WEBINAR SERIES

Building Skills for Success

This series is brought to you by the **News Literacy Project** and content specialists at the **Arizona Department of Education**. Each webinar is 60 minutes long and will include resources, lessons and learning from the News Literacy Project.

Professional Learning Information

Participating educators will receive one hour of professional learning per session attended (up to three hours). After completing each session, participants will receive credit issued by the Arizona Department of Education through APLD. Participants who attend all three sessions will earn a digital badge.

About NLP

Founded in 2008, the News Literacy Project (NLP) is a nonpartisan education nonprofit that works with educators, school districts and states to ensure students receive news literacy instruction before they graduate from high school. Students gain the knowledge and ability to think critically for themselves and to become well-informed members of civic society.

SESSION 1

Is it Legit?

What happens when you encounter information that leaves you scratching your head and wondering whether it's credible, an advertisement or even propaganda? If you simply go down the rabbit hole of the site where you encountered it, you likely won't get the clarity or context you need to make an informed decision. Instead, you more than likely will become submersed in confirmation bias. So instead of going deep, go wide: Employ lateral reading.

**TUESDAY,
APRIL 7
4-5 P.M. MT**

SESSION 2

Google Like a Pro

The internet is inconceivably large and essentially endless! It can be a struggle to find accurate information. Understanding search algorithms can equip students with the ability to Google like a pro! When we know how a program works, we can use it effectively. We will share tips to help improve search results.

SESSION 3

AI's Impact

The state of today's digital landscape includes challenges posed by generative artificial intelligence. Explore strategies for helping determine the credibility of evidence and sources, as well as best practices for teaching about misinformation and conspiratorial thinking. Dive into the world of algorithms and generative AI and weigh the civic and social impact of these technologies.
